

## **Prof. Tamás Decsi**

Tamás Decsi works as professor of paediatrics in the Department of Paediatrics, University of Pécs, Pécs, Hungary. As practising paediatrician, he used to work as neonatologist and then used to treat children with inborn errors of metabolism. His main scientific interest is lipid metabolism in children, but he works also in some fields of paediatric nutrition and evidence-based medicine as well. He is the author of about 200 scientific papers, which received around 800 independent citations up to now. In his minority language of Hungarian, he published a monograph on infant nutrition and another one on nutritional disorders in children. He is the editor of the only Hungarian textbook on feeding sick children.
